ISBN: 978-0-9715863-9-0 Paperback (\$15.95)
979-89867744-0-4 Hardcover (\$39.95)
978-0-9715863-8-3 Kindle (\$7.95)

46 figures/illustrations and 161 footnotes
plus CIP information

If Bigfoot is an Ancient Primate or an Undiscovered Human, why is the Creature Seen Around Balls of Light and Other Paranormal Phenomena?

Thousands of people have witnessed bigfoot and other strange creatures for decades in North America and worldwide. In many cases, these encounters have been followed up and documented including physical evidence by trained investigators. Is bigfoot an undiscovered primate, a relic hominid, or an alien species? And why are so many encounters also filled with unusual and extraordinary phenomena like luminosities, time slips, and telepathic interactions.

Dark Matter Monsters examines critical, new scientific findings in coherent energy-matter and how these ideas help explain seemingly **paranormal phenomena**, like space-time anomalies and orbs, seen around creatures such as **bigfoot** and other mysterious cryptids. Are cryptids related to ball lightning and orbs? **Coherent matter** was a subject of interest to inventor Nicola Tesla over one hundred years ago and many researchers, such as Fleischmann and Pons, who did cold fusion experiments at the University of Utah in the late 1980s. Japanese, American and Russian scientists like Takaaki Matsumoto, Kenneth Shoulders, and Alexander Parkhomov have seen similar results.

You'll Discover:

- What often happens right before a bigfoot encounter and why
- Sudden temperature changes around bigfoot, orbs, and UFOs
- Is the Hitchhiker Effect for real? Or is it something else?
- The Spooky Aharonov-Bohm Effect
- How Godel's **Incompleteness Theorem** relates to bigfoot
- A midwestern US town that **completely lost all electrical devices and power** for an entire day
- The connection between the Fifth State of Matter and ball lightning
- Strange space-time anomalies experienced around bigfoot creatures
- How **weird gravitational effects** are caused by ball lightning
- Unexplained camera and battery failure around cryptids and crop circles
- Why a Pentagon Program called AAWSAP did research at Skinwalker Ranch

"I have been waiting a long time for a book just like this one: *Dark Matter Monsters*. That's because sociologist Simeon Hein Ph.D. has finally developed a solid, plausible and scientifically well-argued solution to one of the most confounding mysteries of our time: The true nature of Bigfoot but also a host of other paranormal mysteries, from UFOs and ghosts to orbs and encounters with parallel universes."—Ken Korczak, medium.com

Table of Contents

Preface

Table of Figures

Introduction

Chapter 1—The Invisible Universe

Chapter 2—"What You Saw Was a Bear." Sociocultural Stigma and Why People Don't Report Encounters with the Unexplained Phenomena

Chapter 3—Characteristics of Exposure to Coherent Matter

Chapter 4—Why Did a Secret DIA Program Study Skinwalker Ranch?

Chapter 5—The Prevalence of Cold Fusion in Life on Earth

Chapter 6—Beyond Technology

Chapter 7—The Fifth State of Matter

Chapter 8—The Crop Circle Connection: Sudden Battery and Camera Failure

Chapter 9—Dark Matter Lifeforms

Chapter 10—Cryptids and Forward-Facing Resonance

Chapter 11—Our Fractal Universe

Chapter 12—Energy Generating Behavior, Chain Reactions, and the Biology of Coherent Matter Lifeforms

Chapter 13—It's the Things You Can't See That Matter the Most

Chapter 14—Living with Invisible Lifeforms
